His critical function is entirely overseen and governed by Cedacri S.p.A., which operates as a Level 1 Service Provider fully compliant with the PCI DSS v 4.0.1 standard.

To maintain the highest levels of data security and compliance, Cedacri International adheres to a strict, multi-layered access control policy managed by CEDACRI:

Principle of Least Privilege: Operators of Cedacri International can not access LIVE PANs (Primary Account Numbers) in any operational context; the only exception to this rule is for explicitly authorized fraud management activities. In these specific cases, Principal Members formally define and justify the business need, granting Cedacri International operators a temporary and strictly monitored mandate for fraud prevention practices.

Cedacri Network Access: All user accounts for accessing the internal Cedacri network are managed directly and exclusively by Cedacri S.p.A.'s own security team.

Principal Member System Access: When operators require access to the Principal Members' external fraud management systems, the credentials and permissions for these systems are granted, controlled, and audited solely by the Principal Members themselves.
